Marblehead, MA • Jackson.selby@gmail.com • (781) 513-3040 • [LinkedIn](#) • [Portfolio](#)

Education

Harvard University

Cambridge, MA

B.S. Mechanical Engineering. Overall GPA: 3.89. Concentration GPA: 3.93

Expected graduation May 2027

Relevant coursework: Mechanics, Computer Aided Machine Design, Intro Electrical Engineering, Heat Transfer, Mechanics of Solids/Statics. Mechanical Systems/Dynamics, Eng. Thermodynamics. Graduate courses: Fluid Mechanics, Medical Device Design. Planned: Control systems, Capstone design, Aerodynamics (MIT), Aerothermodynamics (MIT)

St. John's Preparatory School

Danvers, MA

High School Diploma. GPA: 4.63. SAT: 1560

Graduated May 2023

Awards in academic excellence, Xaverian Brothers Merit Scholarship

Project Experience

ES227 Project (Graduate Medical Device Design)

Cambridge, MA

Team member

January - May 2026

- Designed a novel take on a grasp-assist device for patients with stroke induced hand weakness
- Led activities including prior art searches, creating functional requirements, coordinating with stakeholders (patients and providers), initial design/brainstorm, concept narrowing, final design spec-ing/BOM/ ordering materials, manufacture (milling, tapping, heat treating, etc), product testing, iteration
- Project culminated in a presentation at a class design fair including a live demo for patients, providers, professors

ES220 Project (Graduate Fluid Dynamics)

Cambridge, MA

Team Member

January - May 2026

- Designed and fabricated a 0.94 g walkalong glider for sustained flight at 2.2 m/s in user-generated upwash, estimated lift and drag coefficients from video data, and presented findings to class and professor.
- Iterated through 4+ materials and 12+ airfoil geometries, modifying wing loading, center-of-mass location, dihedral, camber, and leading-edge geometry in response to observed pitch, roll, stall, and flow-separation behavior.

Harvard Undergraduate Robotics Club

Cambridge, MA

Mars Rover Team - Mechanical Division Member

September 2024 - January 2026

- Design rover subsystems including dirt sample collection, transport, and testing
- Designed a retractable screw mechanism, actuated dirt collection mechanism, and automated centrifuge in CAD
- Manufactured parts from raw materials after machine shop training and assembled rover

Work Experience

Pratt and Whitney

Hartford, CT

Production Test

June - August 2026

Engineering Intern

- Supported commercial engine test stand coverage for over 60 engines and 4 different models
- Developed and implemented 22 quality assurance curves and 40+ TIS limit plots in proprietary company software streamlining PW1900G engine data analysis
- Investigated test data alongside PTE engineers to learn about failure modes and validation procedures

The Landing, Sea Salt

Marblehead, MA

Bartender

May - August, 2022 - 2025

- Managed constant demand for beverages in a stressful, fast paced environment

Self Employed

Marblehead, MA

Contract Carpenter

May - August 2021

- Self-taught in Carpentry
- Bought lumber and built eight custom furniture pieces, managing material procurement, manufacturing, and sales
- Designed and built a chicken coop to house four chickens in my backyard, to be later sold on Craigslist

Skills & Interests

Technical: Certification in SolidWorks, MATLAB, Python, COMSOL FEA, GitHub, Machining (Manual/CNC Mill, Lathe), 3D Printing, Welding, Soldering

Interests: Music: Guitar, Classical piano; Athletics: Boxing (club co-captain), Squash (club social chair), Golf (HC: 4.9)
